RED HAIR-MRS. E. M. B. writes

RED MAIR—MRS. E. M. B. writes:

My hair has always been a lovely
shade of red and is fast getting dark
as I grow older. Can you tell me
something to keep it the natural
calor which will not injure the hair
is any way? I have been told to use
heans tea, but this will make it too
light and I do not know how to use
it. Will you advise me, please?"

Henna paste, made from henna
sowder (not tea) is the very best
thing for you to use. You can regulate the shade by the length of time
you leave the paste on. Fifteen minutes makes the hair a dark bronze
shade and longer time makes it
lighter. Henna is vegetable and entirely harmless. Send me two-cent
stamp and ask for the directions for
making the hair red.

TOO SMORT—MISS P. R. L. writes "I am too short for my weight and am seventeen years old. How can I grow taller? What will develop long, thin face?"

As you are so young you have seven years more to grow taller. All stretching exercises will help you. Transom swinging will also make you taller. It is strenuous and should be practised with great care to prevent strain. Facial exercises and bessage will fatten the face some-

RIGGS DISEASE—MRS. C. I. H. writes: "Both my husband and my-self are very much interested in your articles and health talks. My double chin has almost gone through following your exercises. My dentist told me I was starting with Riggs disease. Is there anything I can do for this?"

Use a weak solution of sinc chie-

Use a weak solution of sine chlo-ride (one-half per cent.) for this.

PEARL writes: "I am taking some of your exercises and I feel that they are doing me much good. I also read your beauty questions and answers with interest. Will you please tell me if cocoo butter will grow hair on the face and do you think cream from the milk will fatten my face if I apply it every day? I am 5 feet 7 and weigh 115 pounds. What should I weigh?

I rather think cocoa butter will encourage a growth of down on the face if applied undiluted. It is too rich to use as a massage. Cream

FOREIGN ORDERS DROPPING.

WASHINGTON, Aug. 2.-The monthly summary of business in the United States prepared by the Federal Reserve Board to-day from re-

peris from the agents of the twelve Pederal Reserve districts shows domestic demand gradually taking the place of foreign orders.

"The present trend of business is more along the line of conservatism which bankers and business men have been urging," the summary states. "It tends to a more permanent prosperity. The pressure to place new orders and to stock up heavily, which was so prevalent a month or two ago.

was so prevalent a month or two ago, is disappearing.

"The general business outlook is satisfactory. Crops are better than average in most districts, and the labor situation is satisfactory everywhere except in New York, where the garment warkers are a strike and carment workers are on atrice, and San Francisco, where strikes con-tinue on the water front." ent workers are on strike, and

The May Manton Fashions

HIS is a frock that shows no alone new features in the ragian sleeves in the square neck and in the combination of materials; it also emphasizes the fact that charmouse is to be much worn throughout the late summer. It is a beautiful material, it has always been a favorite and women will be glad to know of its return to fashion. This frock shows it combined with serge, while the soutache is arranged over bands of broadcloth, and the belt is made of the broadcloth. The skirt is in the modified circular style and is joined to the lower edge of the blouse, which extends well below the waist line. The pretty ragian sleeves are novel, and also they are becoming, for they take graceful lines and folds. Sleeves of the kind always mean an easy garment to make, for there is no fitting to be accomplished. This dress represents very complished. This dress represents very little labor, yet it is essentially new and amart. It could, of course, be copied in many different materials. If something thinner and lighter is wanted, taffets could be used with creps in piace of the serge with the satin, or one could think of it made of taffets throughout or of solres slik or of any similar material. For a very simple little frock of washable material, handkerchief linen could be combined with a heavier linen. Plain blue handkerchief linen taking the place of the screen in the same color, would make a very smart frock. For such a dress the trimming could be heavy lace or braiding or anything that seems to suit the occasion and the need. In the back view the dress is shown made of one material throughout, and that treatment is quite as fashionable as the one shown or the figure.

For the sixteen-year size will be needed 25 yards of satin 36, with 5 yards of satin 36, with 5 yards of any width for the bands, or 51 yards 38, 45 yards 44 or 54 to make of one material. The skirt is 35 yards in width at the lower edge.

The lattern, No. 9,162, is cut in sizes for 16 and 13 years.
